# START HERE

**Learn Excel Fast: Beginner to Pro (+ AI Prompts)**
Thank you for your purchase! Read this file first – it takes 2 minutes.

## What is in your pack

- **01_START_HERE.pdf** – this file (you are reading it)
- **02_Learn_Excel_Fast_Guide.pdf** – the 36-page guide (14 chapters)
- **03_shop_sales.xlsx** – shop sales practice (lookups, SUMIF, summary, formula lab)
- **04_customer_credit_ledger.xlsx** – customer credit / tab ledger
- **05_home_budget.xlsx** – monthly home budget + chart
- **06_attendance.xlsx** – attendance register
- **07_sales_invoice.xlsx** – invoice with tax / VAT

## How to start (in this order)

1. Open the guide PDF (02) on your phone or computer.
2. After each chapter, open the matching Excel file (03–07).
3. Use the guide's ChatGPT / Gemini prompts to get formulas written for you.
4. Chapter 13 (Tables, FILTER/UNIQUE, PMT, dashboard, printing, protection, Copilot) uses 03_shop_sales.xlsx – do it after Chapters 1–12.
5. Put your own real data into a practice file and try it.

## Mobile tip

No ZIP needed – download each file from its own link. PDFs open instantly on a phone. Excel files open in Microsoft Excel, Google Sheets or WPS Office.
